### WHY PGD IN BIOSTATISTICS

The Post Graduate Diploma (PGD) in Biostatistics is a specialized program that focuses on the application of statistical methods in the field of public health and biomedical research. This diploma equips students with the necessary skills to analyze and interpret health data, conduct clinical trials, and design research studies effectively. Graduates of this program play a crucial role in shaping evidence-based decision-making in the healthcare industry, contributing significantly to advancements in medical research, epidemiology, and public health policies.
